SUMMARY

Android Developer with experience building user-friendly mobile applications using Kotlin and Java. Strong understanding of Material Design, RESTful APIs, and mobile performance optimization.

SKILLS

Languages: Kotlin, Java, XML

Android: Android SDK, Jetpack Compose, MVVM, Room DB, Retrofit

Tools: Android Studio, Git, Firebase, Postman

Testing: JUnit, Espresso

Other: REST APIs, SQLite, Push Notifications, Google Maps API

EXPERIENCE

Android Developer Intern - MobileApps India

Feb 2024 - Aug 2024

- Developed 3 Android apps published on Google Play Store with 10K+ downloads
- Implemented MVVM architecture improving code maintainability
- Integrated Firebase for real-time database, authentication and push notifications
- Reduced app crash rate by 35% through thorough testing and debugging

PROJECTS

Food Delivery App

Built a food delivery Android app using Kotlin with features like real-time order tracking, Google Maps integration, and Razorpay payment gateway.

Expense Tracker App

Developed a personal finance tracker using Kotlin and Room database with charts for monthly spending analysis using MPAndroidChart.

EDUCATION

B.Tech Computer Science - JKL University

2020 - 2024 | CGPA: 8.2/10

CERTIFICATIONS

- Associate Android Developer - Google (2023)
- Kotlin for Android Developers - Udemy (2022)
- Firebase in a Weekend - Google (2023)
